#### COURSE OFFERINGS

##### UPID – Universal Process IDentification:

- Gain a better understanding of Multivariable Process Control (MPC) and the Finite Impulse Response (FIR) identification technique.
- Learn fundamentals of developing a successful APC model beginning with data collection and ending with analyzing predictions.
- Develop skills for building piece-wise linear transformations, and gain insight on how support maintenance can be reduced with the advanced implementation approach employed by CTC

##### ADMC – Adaptive Dynamic Matrix Control: (Prerequisite UPID Course with special exceptions)

- Learn how to implement, configure, tune and maintain an ADMC application.
- Utilize the ADMC simulation environment to test a model before implementing it on a live system.

##### CTCSim – CTC Training Simulator: (Prerequisite UPID Course with special exceptions)

- Learn how to build, customize, configure and maintain the dynamic simulator.
- Utilize the simulator for training by developing, running and scoring training scenarios.
- Use operator advisor – the online simulator that allows operators to examine “What-If” scenarios based on the current state of the plant.
